THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

ADJU Research Foundation

Whereas, there has been presented to the

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED DISTINCT VARIETY OF SEXUALLY REPRODUCED, OR TUBER PROPAGATED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREBY ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVED HAVE BEEN COMPLIED WITH, AND THE TITLE THEREOF IS FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY; AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) BEING ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION (UNDER THE LAW). NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSIONERS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF TWENTY YEARS FROM THE DATE OF THE GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLACEMENT OF VIABLE SEED OF THE VARIETY IN A PUBLIC DEPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR CONDITIONING IT FOR PROPAGATION, OR STOCKING IT FOR ANY OF THE ABOVE PURPOSES, OR USING IT IN BLENDS OF SIMILAR OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. IN THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS A CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS SPECIFIED BY THE OWNER OF THE APPLICATION, 7 U.S.C. 2331 ET SEQ.

BARLEY

'CONLON'

In testimony whereof, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington, D.C. this fifth day of February, in the year two thousand two.

[Signature]

Commissioner

[Organization]
APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE
(Instructions and information collection burden statement on reverse)

1. NAME OF APPLICANT(S) (as it is to appear on the Certificate)
   NDSU Research Foundation

2. TEMPORARY DESIGNATION OR EXPERIMENTAL NUMBER
   ND13299

3. VARIETY NAME
   'CONLON'

4. ADDRESS (Street and No., or R.F.D. No., City, State, and ZIP Code, and Country)
   c/o Executive Director
   PO Box 5014
   Fargo, ND 58105-5014

5. TELEPHONE (include area code)
   701-231-8931

6. FAX (include area code)
   701-231-1013

7. GENUS AND SPECIES NAME
   Hordeum vulgare L.
   6. FAMILY NAME (Botanical)
      Gramineae

8. CROP KIND NAME (Common name)
   Barley

9. IF THE APPLICANT NAMED IS NOT A "PERSON", GIVE FORM OF ORGANIZATION (corporation, partnership, association, etc.) (Common name)
   501(c)(3) Corporation - NDSU Research Foundation

10. IF INCORPORATED, GIVE STATE OF INCORPORATION
    North Dakota

11. DATE OF INCORPORATION
    May, 1989

12. NAME AND ADDRESS OF APPLICANT REPRESENTATIVE(S), IF ANY, TO SERVE IN THIS APPLICATION AND RECEIVE ALL PAPERS
    Jerome D. Franckowiak
    Department of Plant Sciences
    North Dakota State University
    PO Box 5051
    Fargo, ND 58105-5051

    Dale Zetocha
    Executive Director
    NDSU Research Foundation
    PO Box 5014
    Fargo, ND 58105-5014

13. TELEPHONE (include area code)
    701-231-7540

14. FAX (include area code)
    701-231-8474

15. VOUCHER SAMPLE (2,500 viable untreated seeds or, for tuber propagated varieties, verification that tissue culture will be deposited and maintained in an approved public repository)
    NDSU Research Foundation

16. CHECK APPROPRIATE BOX FOR EACH ATTACHMENT SUBMITTED (Follow instructions on reverse)
   a. [X] Exhibit A. Origin and Breeding History of the Variety
   b. [X] Exhibit B. Statement of Distinctiveness
   c. [X] Exhibit C. Objective Description of the Variety
   d. [X] Exhibit D. Additional Description of the Variety (Optional)
   e. [X] Exhibit E. Statement of the Basis of the Applicant's Ownership
   f. [X] Filing and Examination Fee ($2,450.00), made payable to "Treasurer of the United States" (Mail to PVPO)

17. DOES THE APPLICANT SPECIFY THAT SEED OF THIS VARIETY BE SOLD BY VARIETY NAME ONLY, AS A CLASS OF CERTIFIED SEED? (See Section 8(a) of the Plant Variety Protection Act)
   [X] YES if "yes," answer items 18 and 19 below
   [ ] NO if "no," go to Item 20

18. DOES THE APPLICANT SPECIFY THAT SEED OF THIS VARIETY BE LIMITED AS TO NUMBER OF GENERATIONS?
   [X] YES
   [ ] NO

19. IF "YES" TO ITEM 18, WHICH CLASSES OF PRODUCTION BEYOND BREEDER SEED?
   [X] FOUNDATION
   [X] REGISTERED
   [X] CERTIFIED

20. HAS THE VARIETY OR A HYBRID PRODUCED FROM THE VARIETY BEEN RELEASED, USED, OFFERED FOR SALE, OR MARKETED IN THE U.S. OR OTHER COUNTRIES?
   [X] YES if "yes," give names of countries and dates
   [ ] NO

21. The applicant(s) declare that a viable sample of basic seed of the variety will be furnished with application and will be repatriated upon request in accordance with such regulations as may be applicable, or for a tuber propagated variety a tissue culture will be deposited in a public repository and maintained for the duration of the certificate.

   The undersigned applicant(s) are the owner(s) of this sexually reproduced or tuber propagated plant variety, and believe(s) that the variety is new, distinct, uniform, and stable as required in Section 42, and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act.

   Applicant(s) are informed that false representation herein can jeopardize protection and result in penalties.

EXHIBIT A - ORIGIN AND BREEDING HISTORY

'CONLON'

The original cross (C2-88-207) was made at North Dakota State University (NDSU), Fargo, ND in the 1988 fall greenhouse nursery. The cross C2-88-207 was made between an F3 plant from the cross Bowman*2/DWS1008 as the female parent and ND10232 as the male parent. DWS1008 is a semidwarf mutant, which was isolated in the cultivar Birgitta in Sweden by L.C. Lehmann. TR479 (Norbert/MT547143) was bred at Saskatoon, Canada and released as the two-rowed cultivar Stein. ND10232 was selected from the cross TR479/ND8742; and ND8742 was selected from the cross ND586/Ciho 2376//ND4880/3/ND5993. Both ND8742 and ND10232 appear to have resistance to barley yellow dwarf virus (BYDV) from Ciho 2376. ND5993 was selected from a cross between sister lines selected from the cross Klages/Fergus/Nordic. ND586 is from a complex series of interspecific crosses and is held in the Small Grains Collection as Ciho 15859. ND4880 was selected from the cross Klages/ND1351. Nordic and ND1351 are a six-rowed cultivars while the other parents are two-rowed cultivars and lines.

ND13299 is an F3 derived selection made in 1991 from the cross C2-88-207, which was made to study a semidwarf gene in locally adapted germplasm. ND13299 was selected as a control line and does not have the semidwarf gene or the Ryd2 gene for BYDV resistance from ND10232. ND13299 has a white aleurone, long rachilla hairs, and smooth awns. In appearance and plant height ND13299 is similar to Bowman. In fall greenhouse nurseries, however, ND13299 heads 7 to 10 days later than Bowman. Also, ND13299 lacks barbs on the lateral veins of the lemma while Bowman has teeth. Stability and uniformity for these traits and general appearance has been observed in yield trials and increase plots for four years (1993 to 1996). In recent observations (1997 to 1999), Conlon continues to be uniform for the above traits.

Agronomic and yield data were collected for ND13299 from trials grown in North Dakota in 1991 to 1995. Most comparisons were made with Bowman because ND13299 was released as a possible replacement for Bowman in western North Dakota. ND13299 averaged 19% higher in yield compared to Bowman and 3% lower than Hazen. ND13299 is more resistant to new pathotypes of Pyrenophora teres and Cochliobolus sativus than Bowman, but less resistant than Hazen to C. sativus. ND13299 headed about one day earlier than Bowman and three days earlier than Hazen in these trials. ND13299 was equal to Bowman in height, but it had slightly higher lodging scores.

Data from micromalting tests were collected for ND13299 using seed lots grown in North Dakota from 1991 to 1994. Data comparisons showed that ND13299 was 2% higher than Bowman in malt extract and nearly 20 point higher in diastatic power even though the grain protein level was about a half percent lower. Samples of ND13299 were submitted in 1994 and 1995 for pilot scale quality tests conducted by the American Malting Barley Association (AMBA) and were rated as satisfactory.
ND13299 was released by the North Dakota Agricultural Experiment Station in April 1996 and the name Conlon was recommended. Conlon will be classified by AMBA as a two-rowed non-malting barley until further malt quality tests are conducted and the results evaluated. During the summer of 1996, foundation seed was planted to produce the registered class of seed.

The named Conlon was chosen to honor Thomas J. Conlon (1921-1995), former superintendent of the Dickinson Experiment Station. Mr. Conlon was the agronomist at the station from 1948 to 1969 and superintendent from 1969 to 1991. He was responsible for expansion of the station and its research activities and the introduction of improved cropping systems to area farmers. Mr. Conlon's support was instrumental in establishment of the two-rowed barley breeding program at NDSU and he strongly encouraged utilization of Bowman, the first two-rowed barley variety developed for western North Dakota.

Conlon appeared uniform for all traits except for black seed. The original seed lot used as breeder's seed contain a very low frequency (less than one per 20,000 seeds) of kernels with a black lemma and pericarp. This contamination is believed to have resulted from outcrossing to genetic stocks carrying the Brp1.α allele for very black lemma and pericarp. No other variants or off-type plants have been observed over the past three years.
EXHIBIT B - NOVELTY STATEMENT

To my knowledge, Conlon resembles Bowman barley more than any other two-rowed barley cultivar. Both cultivars have a spring growth habit and head earlier in North Dakota than other two-rowed barley cultivars, which lack the Eam1 gene for strong photoperiod response. Both cultivars have large, plump kernels; long rachilla hairs; little red anthocyanin pigmentation of vegetative plant parts; and relatively short, strap-shaped spikes. Conlon has smooth awns and lacks barbs on the lateral veins of the lemma, while Bowman has semismooth awns and teeth on lateral veins of the lemma. The disease reactions of Conlon and Logan, another recent release from NDSU, are similar. Both cultivars have the Mlk gene for resistance to powdery mildew, incited by Erysiphe graminis f. sp. hordei, and are resistant to several isolates Pyrenophora teres and Cochliobolus sativus. The disease reactions of Logan and Conlon may differ because Conlon is reported to have the mlg for powdery mildew resistance and it is less resistant to C. sativus. Logan has semicompact spikes, red anthocyanin pigment at the base of the sheath, semismooth awns, wider leaves, and teeth on lateral veins of the lemma.
**Objective Description of Variety**

**Barley (Hordeum Vulgare)**

**Instructions:**
See Reverse.

**Name of Applicant(s):**
NDSU Research Foundation

**Address:**
Box 5014
Fargo, ND 58105-5014

**PVP Number:**
9700243

**Variety Name or Temporary Designation:**

1. **Growth Habit:**
   - 1 = SPRING
   - 2 = FACULTATIVE WINTER
   - 3 = WINTER
   - Early Growth: 1 = PROSTRATE
   - 2 = SEMIPROSTRATE
   - 3 = ERECT

2. **Maturity (50% Flowering):**
   - 1 = EARLY (California Mariout)
   - 2 = MIDSEASON (Betzes)
   - 3 = LATE (Frontier)
   - No. of days Earlier than ........
   - 1 = BETZES
   - 2 = CALIFORNIA MARIOUT
   - 3 = CONQUEST
   - 4 = DICKSON
   - No. of days Later than ........
   - 5 = PIROLINE
   - 6 = PRIMUS
   - 7 = UNITAN

3. **Plant Height (From soil level to top of head):**
   - 1 = SEMIDWARF
   - 2 = SHORT (California Mariout)
   - 3 = MEDIUM TALL (Betzes)
   - 4 = TALL (Conquest)
   - Cm. Shorter than ........
   - 1 = BETZES
   - 2 = CALIFORNIA MARIOUT
   - 3 = CONQUEST
   - 4 = DICKSON
   - 5 = PIROLINE
   - 6 = PRIMUS
   - 7 = UNITAN

4. **Stem:**
   - Excroton (Flag to spike at maturity):
     - 1 = 0-3 cm.
     - 2 = 3-10 cm.
     - 3 = 10-15 cm.
   - Anthocyanin:
     - 1 = ABSENT
     - 2 = PRESENT
   - NO. OF NODES (Originating from node above ground)
     - 1 = CLOSED
     - 2 = V-SHAPED
     - 3 = OPEN
   - Collar Shape:
     - 1 = STRAIGHT
     - 2 = SNAKY
   - Shape of Neck:
     - 1 = STRAIGHT
     - 2 = SNAKY

5. **Leaf:**
   - Basal leaf sheath (seedling):
     - 1 = GLABROUS
     - 2 = PUBESCENT
   - Waxiness:
     - 1 = ABSENT (Glossy)
     - 2 = SLIGHTLY WAXY
     - 3 = WAXY
   - CM. LENGTH (First leaf below flag leaf):
     - 1 = DROOPING
     - 2 = UPRIGHT
   - Position of flag leaf (at boot stage):
     - 1 = LAX
     - 2 = ERECT (Not dense)
   - Density:
     - 3 = ERECT (Dense)
   - MM. WIDTH (First leaf below flag leaf):
     - 1 = WAXY
     - 2 = SLIGHTLY WAXY
   - Waxiness:
     - 1 = ABSENT (Glossy)
     - 2 = SLIGHTLY WAXY
     - 3 = WAXY
   - Anthocyanin in leaf sheaths:
     - 1 = ABSENT
     - 2 = PRESENT

6. **Head:**
   - Type:
     - 1 = TWO-ROWED
     - 2 = SIX-ROWED
   - Shape:
     - 1 = TAPERING
     - 2 = STRAP
     - 3 = CLAVATE
     - OTHER (Specify)
   - Lateral Kernels Overlap:
     - 1 = NONE
     - 2 = AT TIP
     - 3 = 1/4-1/2 OF HEAD
   - Rachis (Hair on edge):
     - 1 = LACKING
     - 2 = FEW
     - 3 = COVERED
   - Rachis (Hair on edge):
     - 1 = LACKING
     - 2 = FEW
     - 3 = COVERED
   - Density:
     - 1 = LAX
     - 2 = ERECT (Not dense)
   - Shape:
     - 3 = ERECT (Dense)
   - Width:
     - 4 = OTHER (Specify)
   - Waxiness:
     - 1 = ABSENT (Glossy)
     - 2 = SLIGHTLY WAXY
     - 3 = WAXY
   - Anthocyanin in leaf sheaths:
     - 1 = ABSENT
     - 2 = PRESENT

7. **Glume:**
   - Length:
     - 1 = 1/3 OF LEMMA
     - 2 = 1/2 OF LEMMA
     - 3 = MORE THAN 1/2 OF LEMMA
   - Hairs:
     - 1 = NONE
     - 2 = SHORT
     - 3 = LONG
   - Hair covering:
     - 1 = NONE
     - 2 = RESTRICTED TO MIDDLE
     - 3 = CONFINED TO BAND
     - 4 = COMPLETELY COVERED
   - Arns:
     - 1 = LESS THAN EQUAL TO LENGTH OF GLUMES
     - 2 = EQUAL TO LENGTH OF GLUMES
     - 3 = MORE THAN EQUAL TO LENGTH OF GLUMES
   - Arns Surface:
     - 1 = SMOOTH
     - 2 = SEMISMOOTH
     - 3 = ROUGH
8. LEMA:

- **Awn:**
  - 1 = AWNLESS
  - 2 = AWNLET ON CENTRAL ROWS
  - 3 = SHORT ON CENTRAL ROWS, AWNLET ON LATERAL ROWS
  - 4 = SHORT (less than equal to length of spike)
  - 5 = LONG (longer than spike)
  - 6 = HOODED

- **Awn Surface:**
  - 1 = AWNLESS
  - 2 = SMOOTH
  - 3 = SEMISMooth
  - 4 = ROUGH

- **Teeth:**
  - 1 = ABSENT
  - 2 = FEW
  - 3 = NUMEROUS

- **Shape of base:**
  - 1 = DEPRESSION
  - 2 = SLIGHT CREASE
  - 3 = TRANSVERSE CREASE

- **Hairs:**
  - 1 = ABSENT
  - 2 = PRESENT

- **Rachilla Hairs:**
  - 1 = SHORT
  - 2 = LONG

9. STIGMA:

- **Hairs:**
  - 1 = FEW
  - 2 = MANY

10. SEED:

- **Type:**
  - 1 = NAKED
  - 2 = COVERED

- **Length:**
  - 1 = SHORT (8.0 mm.)
  - 2 = SHORT TO MIDLONG (7.5 - 9.0 mm.)
  - 3 = MIDLONG (8.5 - 9.5 mm.)
  - 4 = MIDLONG TO LONG (9.0 - 10.5 mm.)
  - 5 = LONG (10.0 mm.)

- **Wrinkling of hull:**
  - 1 = NAKED
  - 2 = SLIGHTLY WRINKLED
  - 3 = SEMIWRINKLED
  - 4 = WRINKLED

- **Aleurome Color:**
  - 1 = COLORLESS (White or Yellow)
  - 2 = BLUE

11. DISEASE:

- **SEPTORIA**
  - 1 = NET BLOTCH
  - 2 = BACTERIAL BLIGHT

- **LOOSE SMUT**
  - 1 = COVERED SMUT

- **STEM RUST**
  - 1 = LEAF RUST

- **AY**
  - 1 = BSIV

- **POWDERY MILDEW**
  - 1 = SPOT BLOTCH

- **FALSE LOOSE SMUT**
  - 2 = SCAB

- **SCALD**
  - 3 = BYDV

- **OTHER (Specify)**

12. INSECT:

- **GREEN BUG**
  - 1 = ENGLISH GRAIN APHID

- **GRASS HOPPERS**
  - 0 = CEREAL LEAF BEETLE

- **HESSIAN FLY RACES**
  - A
  - B
  - C
  - D
  - E
  - F
  - G

- **OTHER (Specify)**

13. CHEMICAL:

- **DDT**
  - 0 = OTHER (Specify)

14. INDICATE WHICH VARIETY MOST CLOSELY RESEMBLES THAT SUBMITTED:

COLOR: Nickerson's or any recognized color fan may be used to determine color of the described variety.
REPRODUCE LOCALLY. Include form number and date on all reproductions.

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 652a) and the Paperwork Reduction Act (PRA) of 1980. Application is required in order to determine if a plant variety protection certificate is to be issued (7 U.S.C. 2421). Information is held confidential until certificate is issued (7 U.S.C. 2426).

EXHIBIT E
STATEMENT OF THE BASIS OF OWNERSHIP

1. NAME OF APPLICANT(S)

NDSU Research Foundation

2. TEMPORARY DESIGNATION
   OR EXPERIMENTAL NUMBER

ND13299

3. VARIETY NAME

'CONLON'

4. ADDRESS (Street and No., or R.F.D. No., City, State, and ZIP Code, and Country)

C/o Executive Director
PO Box 5014
Fargo, ND 58105-5014

5. TELEPHONE (Include area code)

701-231-8931

6. FAX (Include area code)

701-231-1013

7. PVPO NUMBER

8. Does the applicant own all rights to the variety? Mark an "X" in appropriate block. If no, please explain. [X] YES [ ] NO

9. Is the applicant (individual or company) a U.S. national or U.S. based company?
   If no, give name of country [X] YES [ ] NO

10. Is the applicant the original breeder? If no, please answer the following:
    a. If original rights to variety were owned by individual(s):
       Is (are) the original breeder(s) a U.S. national(s)? If no, give name of country [X] YES [ ] NO
       
    b. If original rights to variety were owned by a company:
       Is the original breeder(s) U.S. based company? If no, give name of country [X] YES [ ] NO

11. Additional explanation on ownership (If needed, use reverse for extra space):

See additional Exhibit E Statement of the Basis of the Applicant's Ownership included in this application.

PLEASE NOTE:

Plant variety protection can be afforded only to owners (not licensees) who meet one of the following criteria:

1. If the rights to the variety are owned by the original breeder, that person must be a U.S. national, national of a UPOV member country, or national of a country which affords similar protection to nationals of the U.S. for the same genus and species.

2. If the rights to the variety are owned by the company which employed the original breeder(s), the company must be U.S. based, owned by nationals of a UPOV member country, or owned by nationals of a country which affords similar protection to nationals of the U.S. for the same genus and species.

3. If the applicant is an owner who is not the original breeder, both the original breeder and the applicant must meet one of the above criteria.

The original breeder may be the individual or company who directed final breeding. See Section 41(a)(2) of the Plant Variety Protection Act for definition.

Public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OFFICIAL, AG Box 1630, Jamie L. Whitten Building, Washington, D.C. 20250. When replying, refer to OMB No. 0581-0055 and form number in your letter.

Under the PRA of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2181.

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C. 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.
EXHIBIT E -

STATEMENT OF THE BASIS OF THE APPLICANT'S OWNERSHIP

Dr. Jerome D. Franckowiak, an employee of the North Dakota Agricultural Experiment Station and North Dakota State University, is the plant breeder who developed the cultivar 'CONLON' two-rowed spring barley for which Plant Variety Protection is hereby sought. The employee by agreement and because of the condition of the use of facilities and funds of the North Dakota Agricultural Experiment Station and North Dakota State University has assigned all ownership rights to 'CONLON' barley to the North Dakota Agricultural Experiment Station and North Dakota State University.

North Dakota State University on behalf of the North Dakota Agricultural Experiment Station has assigned all ownership rights to the NDSU Research Foundation. The NDSU Research Foundation is a nonprofit corporation set up to own and manage the intellectual property of North Dakota State University.
