

## **Cotton Varieties Planted, United States 2001 Crop**

The Paymaster brand of upland cottonseed was the most popular planted in the United States for the 2001-2002 season, according to the USDA, Agricultural Marketing Service's Cotton Program. The Deltapine brand was the second most popular followed by Stoneville, Sure-Grow, Aventis, CPCSD, Phytogen, and All-Tex.

Transgenic varieties - genetically engineered varieties resistant to worms, herbicides or both - accounted for about 78 percent of the upland cotton planted in the United States in 2001. This is up from 72 percent of the U.S. upland cotton acreage in crop year 2000. Usage in 2001 varied from a high of 97 percent in Tennessee to a low of 36 percent in California. Texas producers planted transgenic varieties to 65 percent of their 6.2 million cotton acres.

Paymaster brand varieties were the most popular planted in 2001, accounting for 37.1 percent of the United States acreage. This brand accounted for 6.3 percent of the acreage planted in the southeastern states (Alabama, Florida, Georgia, North Carolina, South Carolina and Virginia). It accounted for 31.2 percent of the acreage planted in the south central states (Arkansas, Louisiana, Mississippi, Missouri and Tennessee), 64.9 percent in the southwestern states (Oklahoma and Texas), and 1.4 percent of the acreage planted in the western states (Arizona, California and New Mexico). Paymaster's most popular varieties were PM 2326 RR, PM 1218 BG/RR, and PM 2200 RR, accounting respectively for 11.4, 10.7, and 5.6 percent of the U.S. acreage.

Deltapine brand varieties were the second most popular planted in 2001, accounting for 30.7 percent of the United States acreage. These varieties accounted for 59.1 percent of the acreage planted in the southeastern states, 28.7 percent in the south central states, 14.4 percent in the southwestern states, and 37.4 percent in the western states. The most popular Deltapine varieties were DP 451 B/RR and DP 458 B/RR, accounting respectively for 6.4 and 5.4 percent of the U.S. acreage.

Stoneville varieties were the third most popular planted in 2001. These varieties accounted for 12.1 percent of the acreage planted. They accounted for 12.8 percent of the acreage planted in the southeastern states, 26.3 percent of the acreage in the south central states, 2.6 percent in the southwestern states, and 3.1 percent in the western states. The most popular Stoneville variety was ST 4892BR, which accounted for 5.8 percent of the United States acreage planted to cotton.

Sure-Grow varieties were the fourth most popular planted in 2001. These varieties accounted for 7.8 percent of the U.S. acreage and accounted for 16.7 percent of the southeastern states planted acreage, 11.7 percent in the south central states and 1.2 percent in the western states.

Aventis varieties were the next most popular and accounted for 4.5 percent of the U.S. acreage planted in 2001. The percentage of acres planted to Aventis varieties more than doubled from the 2000 crop. These varieties showed particular strength in south Texas, North Carolina, Virginia, and Georgia.

Phytogen was the most popular brand of American Pima planted in 2001. Phytogen varieties PHY 57 Pima and PHY 76 Pima accounted for 47.7 percent of the United States Pima acreage and were the most popular varieties planted in California. Pima S-7 was the third most-planted American Pima variety and was the most popular Pima variety in Arizona and Texas. It accounted for 17 percent of the U.S. crop. Deltapine's DP HTO Pima and DP 340 Pima were the next most popular varieties and accounted respectively for 12.6 and 8.2 percent of the U.S. Pima acreage.

Estimates of the percentage of the various varieties of cotton planted in the United States for 2001 were based on informal surveys made by the Cotton Program Classing Offices. Those surveyed included ginners, seed dealers, extension agents, and other knowledgeable sources.
