## **Cotton Varieties Planted, United States 2010 Crop**

The Bayer CropScience Fibermax brand of Upland cottonseed was the most popular planted in the United States for the 2010-2011 season, according to the USDA, Agricultural Marketing Service's Cotton and Tobacco Programs. The Deltapine brand was the second most popular followed by Phytogen, Bayer CropScience Stoneville, Americot, All-Tex, and Dyna-Gro.

Transgenic varieties - genetically engineered varieties resistant to worms, herbicides, or both - accounted for about 95.9 percent of the Upland cotton planted in the United States in 2010. Usage of transgenic varieties in 2010 varied from a high of 100 percent in Kansas, South Carolina, and Virginia to a low of 84.0 percent in California. Other states planted from 97-99 percent transgenic except for Texas (93.4 percent) and New Mexico (89.4 percent).

Bayer CropScience Fibermax brand varieties were the most popular planted in 2010, accounting for about 39.0 percent of the United States acreage. These varieties accounted for almost 9 percent of the acreage planted in the southeastern states (Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia). It accounted for just over 5 percent in the south central states (Arkansas, Louisiana, Mississippi, Missouri, and Tennessee), 63.8 percent in the southwestern states (Texas, Oklahoma, and Kansas), and 20.4 percent in the western states (Arizona, California, and New Mexico). The most popular Bayer CropScience Fibermax varieties were FM 9058 F, FM 9160 B2F, FM 9063 B2F, and FM 1740 B2F, accounting respectively for about 10.4, 5.5, 4.7, and 4.2 percent of the United States acreage planted to Upland cotton.

Deltapine brand varieties were the second most popular planted in 2010, accounting for about 25.6 percent of the United States acreage. This brand accounted for 51.6 percent of the acreage planted in the southeastern states, 28.1 percent of the acreage planted in the south central states, 13.7 percent in the southwestern states, and 33.7 percent of the acreage planted in the western states. Deltapine's most popular varieties were DP 555 BG/RR, DP 0912 B2RF, DP 0949 B2RF, and DP 0935 B2RF, accounting respectively for 4.3, 3.7, 3.2, and 2.7 percent of the U.S. Upland cotton acreage.

Phytogen brand varieties were the third most popular planted in 2010, accounting for about 12.2 percent of the United States acreage. They accounted for 26.7 percent of the acreage planted in the southeastern states, 21.7 percent of the acreage in the south central states, just under 2.0 percent in the southwestern states and 30.5 percent in the western states. The most popular Phytogen brand varieties were PHY 375 WRF and PHY 370 WR, accounting respectively for about 7.9 and 1.3 percent of the United States acreage planted to Upland cotton.

Bayer CropScience Stoneville brand varieties were the fourth most popular planted in 2010. These varieties accounted for about 11.2 percent of the acreage planted. They accounted for 10.3 percent of the acreage planted in the southeastern states, 38.9 percent of the acreage in the south central states, 2.1 percent in the southwestern states, and 12.0 percent in the western states. The most popular Stoneville varieties were ST 4288 B2F, ST 5458 B2F, and ST 5288 B2F accounting respectively for 2.6, 2.4, and 2.0 percent of the United States acreage planted to Upland cotton.

Americot brand varieties were the next most popular and accounted for about 6.2 percent of the U.S. acreage planted in 2010. All-Tex brand varieties were the next most popular and accounted for about 2.7 percent of the U.S. acreage planted in 2010. Dyna-Gro varieties were the seventh most popular and accounted for about 1.5 percent of the 2010 cotton acreage.

Phytogen was the most popular brand of American Pima varieties planted in 2010. Phytogen variety PHY 805 RF accounted for 58.1 percent of the United States Pima acreage and was the most popular variety planted in California (65.5 percent of California Pima acreage). Phytogen's PHY 800 was the second most planted American Pima variety and accounted for 12.7 percent of the U.S. crop. Deltapine's DP 340 was the next most popular variety and accounted for 12.5 percent of the U.S. Pima acreage.

Bayer CropScience FM 958, FM 989 and ADF 2485 were the predominate varieties planted by Organic cotton producers.

Estimates of the percentage of the various varieties of cotton planted in the United States for 2010 were based on informal surveys made by the Cotton Program Classing Offices. Those surveyed included ginners, seed dealers, extension agents, and other knowledgeable sources.
